NOTICE 25ILO

Content Protection & Access Notice

1. Notice of Protection

Any document, file, or content that is served or transmitted via the Cloudflare network through the domain https://aethyr-global.com/, and connected to the hosting service at fil-site.pages.dev, is protected under the GIGA Licence. This Licence governs the terms under which such content may be accessed, viewed, copied, or otherwise used.

2. GIGA Licences Archive Explorer

The authoritative record of all GIGA Licences, including the licence terms applicable to content covered by this notice, is maintained at the GIGA Licences Archive Explorer (the “ALR”), accessible at https://aethyr-global.com/. This is considered the single source of truth for licence status, scope, and validity.

3. Licence Checker

An automated licence checker is installed and active on the above domain and its connected hosting environment. This system verifies, on each request, whether the accessing party holds a valid and current GIGA Licence before granting access to protected content.

- Verifies the presence of a valid licence credential before serving protected content
- Logs access attempts for audit and enforcement purposes
- Automatically blocks requests that fail validation

4. Prohibition of Non-Valid Access

Access to, reproduction of, or distribution of any protected document or content described in Section 1 by any party that does not hold a valid, current GIGA Licence is strictly prohibited. Any attempt to bypass, circumvent, or disable the licence checker described in Section 3 is likewise prohibited and may constitute a violation of this notice and of applicable law.

5. Unauthorized Acquisition of Data

Any party that acquires, downloads, copies, or otherwise obtains data, documents, or content from the domain and hosting environment named in Section 1, without that party being listed as a valid licence holder on the ALR, has acted in violation of the applicable international legal framework governing such content and has breached the rules of the site and the legal framework set out in this GIGA Licence. Such acquisition is treated as unauthorized and non-

valid access for all purposes under this notice, irrespective of the means by which it was obtained.

Any data or legal documents acquired from the site by a party that does not hold a valid GIGA Licence at the time of acquisition shall be considered non-valid and without legal effect, including before a court of law, and may not be relied upon as authentic or admissible evidence in any proceeding.

6. Scope

This notice applies to all content that is, at any time, routed through, cached by, or otherwise made available via the Cloudflare server associated with the domain named in Section 1, regardless of where the underlying content was originally authored or stored.

7. Enforcement & Contact

Questions regarding licence status, requests for a valid GIGA Licence, or reports of unauthorized access should be directed through the GIGA Licences Archive Explorer referenced in Section 2.

This notice is issued by the operator of the domain and hosting environment named above and is effective from the date of publication.
